

GOODS LIFTS

Breakell goods lifts have been serving Britain for over 75 years and as such we've gathered an impressive reputation for developing robust, high performance goods lifts. Our Goods/Passenger Lifts are available in any size or capacity and suitable for a wide range of applications.

ROLL CAGE LIFTS

Breakell's Roll Cage Lift has been developed over several years. Working closely with our partners in the retail industry we have created a simple, reliable, durable stock moving lift. The roll cage lift cuts down installation time ensuring shorter programs when refurbishing shop floors and stock rooms. Available in custom sizes the RCL can be installed in existing lift shafts.
